Rotterdam Shortsea Terminals expands service provision

Twice-weekly direct barge connection RST – Maasvlakte v.v.

As of the 1st of January 2023, we provide a twice-weekly direct barge service with the deepsea terminals at Rotterdam's Maasvlakte. The connections are offered in collaboration with the Danser Group and EGS and call at RST every Wednesday and Sunday.

 **Reliable transit times thanks to fixed windows** at APMT, ECT Delta, ECT Euromax, RWG, Kramer and RST itself

 **Easy connection of transshipment cargo** from shortsea to deepsea and vice versa

 **Ideal internal port transport** for using RST as an efficient extended gate (ISPS approved), close to the European market

 **Sustainable transport** by barge, no costly Maasvlakte-related truck kilometres and waiting times

Want to know more or directly book on this sustainable service? We will gladly assist you!
